

CoSN For Small Districts: Mobile Learning

Small districts leaders have become adept at doing more with less due to the unique challenges they face, and can be more nimble in implementing change than their larger counterparts. These leaders wear many hats and don't have time to waste when it comes to connecting with a national professional organization. That's why many small district leaders turn to CoSN resources - they help small districts get the most bang for their buck when implementing a digital leap.

“ As a small district leader, I use CoSN to help me stay connected to the latest information. CoSN is a valuable member of my districts technology team. ”

- Mike Jakel, CETL Director of Technology, Platte Valley Schools RE-7

What is Digital Transformation?: It's not about the device. Digital transformation means having the technological and human infrastructure in place to continually evolve teaching and learning using technology. This [infographic](#) outlines what transformation looks like in five key areas: Student Outcomes, Teacher Outcomes, Culture, Infrastructure, and the IT Organization.

Video: Recipe for Digital Transformation Success: Districts that are successful at digital transformation have certain things in common, as do districts that struggle. This short series of [videos](#) outline key practices that lead to a successful implementation.

Best Practices and Pitfalls of Mobile Learning: (1) Putting technology ahead of pedagogy (2) No project plan or project manager (3) Inability to take risk. These are three of the common mistakes that occur in many digital transformation implementations. This [infographic](#) outlines both common pitfalls and best practices in taking the digital leap.

Guide to Mobile Learning: Simply put, what are the best practices for implementing a mobile learning project? The [Administrator's Guide](#) outlines the steps and elements to remember when diving in to digital learning. Do you have your measures and metrics in place? Are you taking into account the total cost of ownership, and the value of your investment? Are you paying as much attention to your human infrastructure as your technology infrastructure? And more...

“ The partnership Piedmont City School District has formed with CoSN team has proven extremely beneficial to our administrative team and ultimately to our learning initiatives in Piedmont. The research-based resources that CoSN makes available to its members are incredibly helpful, especially for small districts that may not have a large Technology staff. ”

- Rena Seals, Director of Technology, Piedmont City School District
