

CoSN MEMBERS ENJOY EXCLUSIVE BENEFITS

If you're an institutional or corporate CoSN member, you already know membership pays for itself throughout the year. If you're not yet a member, we urge you to join us and enjoy these special benefits.

- Member-only discounts on CoSN products and services, including Webinars, regional CTO Clinics and publications
- Networking opportunities at our annual conferences and other capacity-building gatherings
- Vital representation in Washington, before Congress, federal agencies and the administration
- Complimentary *EdTEchNext Reports*, the annual *Compendium*, the *CoSN Bulletin* e-newsletter and *Washington Update*
- Access to essential resources at myCoSN, members-only section of our website
- Visibility, branding and access for corporate members

Membership in CoSN easily pays for itself with discounts for the annual conference, complimentary registration for a CTO Clinic, and the Webinar series, as well as free members-only periodicals and publications.

Global connections are vital to transforming the education process and improving learning.

The Consortium for School Networking (CoSN) is the world's leading professional organization, representing the interests of K-12 school district technology leaders.

Our mission is to empower these leaders to use technology strategically to improve teaching and learning in the 21st century.

EMPOWERING K-12 TECHNOLOGY LEADERS FOR 21st CENTURY LEARNING

Leadership

Vision

Professional Development

Advocacy

Community

Design: hemessyink.com

Technology in education is an essential component for K-12 teaching and learning and the role of school district technology leaders is increasingly critical.

ABOUT COSN

The world's foremost professional organization for education technology leaders, the Consortium for School Networking has been providing leadership, vision, professional development tools, advocacy and a community for our members, since 1992.

Committed to serving our global network of education and technology leaders, policymakers and executives in the public and private sectors, we promote the strategic use of technology to improve teaching and learning.

To ensure our members' success in the ever-changing landscape of technology learning, CoSN offers tools to boost their management skills, broaden their influence and responsibilities, and prepare them to become more effective education leaders ... not just technology leaders ... in their districts.

Making the case for district technology leaders to be part of the executive leadership team of education organizations.

BUILDING CAPACITY

Because professional development is key to the success of K-12 technology leaders, CoSN offers invaluable resources and publications to build our members' competencies and keep them up-to-date on emerging trends, issues and technologies.

Leadership Initiatives: Designed to help technology leaders address key challenges in the field, these educator-focused, vendor-neutral Leadership Initiatives highlight the integration of technology into the daily instructional and administrative routines of school districts.

Educational Webinars: Bringing timely topics to the forefront, CoSN's interactive webinars give members a chance to share perspectives, insights and strategies with their colleagues.

Periodicals and Publications: To keep members informed year-round, CoSN publishes *EdTechNext Reports* and its annual *Compendium*, featuring critical issues for education technology leaders, and sends out its *Bulletin* e-newsletter and *Washington Update*.

Professional Certification: With an eye to the future, CoSN has created the *Framework of Essential Skills of the K-12 CTO (V. 2.0)* for district technology leaders to expand their skills and competencies, and prepare them for CTO certification. To learn more, visit www.cosn.org/Framework.

Technology enables innovation, greater efficiencies and productivity in our educational system. The primary challenge we face in using it effectively is human capacity.

NETWORKING OPPORTUNITIES

To spark dialogue, collaboration and professional growth among our institutional and corporate members, CoSN creates valuable opportunities to meet face-to-face at our Annual Conference, CTO Leadership Forums, Regional CTO Clinics and state chapter meetings.

The effective use of technology for the systemic transformation of learning cannot occur without a strong organization, leadership and vision.

ADVOCACY

CoSN maintains a strong voice and vital presence in Washington to champion the interests of our members and ensure that federal legislation and policy support education technology. We also conduct an annual Washington Education Technology Policy Summit to provide education leaders with the tools and training to become influential advocates for education technology; and offer opportunities to be part of the FREE Education Technology Action Network (ETAN), which provides the latest news on funding and policies impacting ed tech. See www.edtechactionnetwork.org.
